

Have your studio or company's name and logo pre-printed on blank cd's - a quality touch that will impress your clients.

As with cd duplication and replication, the quantity and required turnaround time are factors in whether you should have your blank media thermally printed or silkscreened. If you require low quantities and/or need them *yesterday*, then thermal printing is what you need. Please contact us for specifications and limitations of thermal label printing so we can make *your* job easier. For larger runs, or if turnaround time is a little more flexible, or if your logo for instance requires specific Pantone colors, then silkscreen becomes an option. Again, please see our artwork [specifications](#) for requirements to ensure beautiful preprinted discs.

NEW LOWER PRICES & EXPANDED SERVICE!!!

THERMAL Customized Media - Ideal for short runs and fast turnaround:

Using only top-quality shiny silver surface media, your label is branded on using crisp monochrome black or full color **thermal** cd label printing - cleaner than inkjet and virtually indistinguishable from silkscreen. Choose between our top-quality, 100% guaranteed standard media or our Pro-Line Quantegy brand cd's. You will be assigned a job number for easy reorders of the same setup.

100% Guaranteed top-quality media

(No minimums. Included is the cd-r media and thermal printing. Please see our [Packaging](#) options!)

monochrome black, per disc

color, per disc

For both black or color, add \$25.00 cd label setup charge (waived for subsequent orders of the same setup)
